TUF VOYAGING

BY GEORGE R. R. MARTIN

\$30 Hardcover (1-59222-004-5)

\$16 Trade (1-59222-005-3)

Haviland Tuf has become the proud owner of the last seedship of Earth's legendary Ecological Engineering Corps. Which means the most powerful weapon in human space is in good hands. With his unique equipment, Tuf is set to tackle the problems human settlers have created in colonizing far-flung worlds—and in every case, the only thing that stands between the colonists and disaster is Tuf's ingenuity—and his reputation as an honest dealer in a universe of rogues.

Three classic Sime-Gen novels in one volume! Following a cataclysm, humanity is divided into two antagonistic mutant forms: the Simes and the Gens. To survive, the Simes feed on an energy produced by Gens in a transfer process that kills the Gens. Gen communities are raided by Simes, the Gens held in pens by the Simes to use when needed. This is the story of how, when faced with extinction, these two disparate peoples learn to set aside their fear and hatred and live in Unity.
